

Abhijeet Gautam

Senior Associate Programmer | .NET Full Stack Developer

3+ years of experience building regulatory and financial systems for capital markets

☎ +91 6200493386 | ✉ abhijeetgautam2023@gmail.com | 🔗 linkedin.com/in/abhijeet-gautam-a49782195

TECHNICAL SKILLS

Languages & Backend: C#, Python, SQL, ASP.NET Core (.NET 8), ASP.NET MVC, RESTful Web APIs, Entity Framework Core, Dapper, LINQ, SignalR, Background Worker Services

Frontend: Angular (v22, standalone components), TypeScript, JavaScript, RxJS, Angular Material, Bootstrap 5, HTML5, CSS3

Databases: SQL Server, Oracle, PostgreSQL, MySQL, T-SQL, Stored Procedures, Query Optimization

Performance: Multithreading, Parallel Programming (TPL), Python (Polars), Async/Await, Apache Parquet, Caching (Redis, In-Memory)

Security: JWT Authentication, SAML 2.0 Single Sign-On (SSO), Microsoft Entra ID (Azure AD), Role-Based Access Control (RBAC), Multi-Factor Authentication (OTP), OWASP Top 10, VAPT (Penetration Testing) Remediation

Architecture & DevOps: Data Structures & Algorithms, System Design (HLD/LLD, Scalability, Caching, Load Balancing), SOLID Principles, Design Patterns, Dependency Injection, xUnit, Moq, Git, GitHub Actions, CI/CD Pipelines, IIS, Agile/Scrum

PROFESSIONAL EXPERIENCE

ICRA Analytics Ltd. (Kolkata, India)

Sep 2023 – Present

Senior Associate Programmer

- **Cut a business-critical batch-processing job by 98%, from 2 hours to 2 minutes**, by re-architecting sequential workflows into multithreaded parallel pipelines in ASP.NET Core (.NET 8) and offloading large-scale data transformations to an in-process Python (Polars) analytics engine.
- **Enabled deployment on any client's database standard without forking the codebase** by building a runtime-switchable data access layer across SQL Server, Oracle, PostgreSQL, and MySQL, and raised ingestion throughput for millions of daily trade records via engine-native bulk-copy paths (SqlBulkCopy, PostgreSQL binary COPY, MySqlBulkCopy) with Parquet staging.
- **Remediated VAPT audit findings and moved enterprise clients onto centralized identity** by implementing JWT authentication middleware, email OTP multi-factor login, per-IP rate limiting, hardened security headers (CSP, HSTS, X-Frame-Options), and SAML 2.0 SSO with Microsoft Entra ID (Azure AD).
- **Delivered full stack features end to end** across 34 Angular standalone components and ASP.NET Core Web APIs, including real-time file-upload progress over SignalR that removed manual page refreshes on long-running imports.
- **Reduced manual release effort and deployment errors** by building GitHub Actions CI/CD pipelines that publish the .NET API, the Angular app, and Cython-compiled Python modules to IIS and a Windows service.

KEY PROJECTS

POMA (Prevention of Market Abuse) & Portfolio Overlap

ICRA Analytics

ASP.NET Core (.NET 8), C#, Angular, SQL Server, Oracle, PostgreSQL, MySQL, Python (Polars), SignalR

- Market-surveillance and portfolio-analytics platform detecting market-abuse patterns in high-volume tick and trade data and measuring holdings overlap across portfolios; **ships two independently licensed products from one repository** via compile-time module switching.

Treasury Solutions & MFI Explorer

ICRA Analytics

ASP.NET Core, ASP.NET MVC, Web API, Angular, SQL Server

- **Modernized legacy treasury desktop tools into web platforms** by building RESTful Web APIs and Angular reporting modules, and improved report response times through SQL Server indexing and stored procedure optimization.

EDUCATION & CERTIFICATION

B.Tech in Information Technology

2019 – 2023

B. P. Poddar Institute of Management and Technology, Kolkata | CGPA: **8.9 / 10**

Generative AI Mastery Certificate for Software Development, upGrad & Microsoft

Nov 2025
